## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17 and 22-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Woodside 5,972,503, for reasons of record.

### ***Response to Arguments***

Applicant's arguments filed February 9, 2004 have been fully considered but they are not persuasive.

Applicants argue that the material of Woodside is not formed by introducing a catalyst composition as a pre-coating and that Woodside's only mention of a catalyst is that the chemical treatment may also include one or more processing aids.

In this concern, it should be noted that some of the processing aids taught by Woodside as being suitable are known catalyst materials, such as di-n-butyl terephthalate. Accordingly, Woodside does in fact teach that his fibrous carrier substrate can be pre-coated with a catalyst material.

Applicants argue that nowhere does Woodside teach or suggest at least one layer of a pre-coating a catalyst of a solvent-free binder resin composition applied to the

surface of each of said at least one strand of said fibrous carrier substrate and at least one of a solvent-free binder resin composition applied to an outer layer of said at least one layer of said pre-coating as claimed by applicants.

In this regard, it should be noted that applicants' claim 17 is not limited to pre-coating a catalyst of a solvent-free binder resin composition. Moreover, at column 10, and line 66 through column 11 and line 23, Woodside specifically teaches that the chemical treatment is solvent-free. As to the binder resin, Woodside teaches that the binder resin can be wire coated or extruded onto the pre-coated fibrous substrate. This teaching necessarily would include binder materials that are solvent-free, as in the usage of polymer chips or pellets that are put into hoppers in the extrusion process.

Therefore, the examiner's position remains that the prior art teaching of Woodside would have rendered obvious the invention as claimed in the present claims.

***Allowable Subject Matter***

Claims 18 and 29-31 are allowed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
